

**CARACOOM is a new lead  
provider that works  
differently from the rest.**

**How?**

# Receiving New Leads (we call them Quote Requests or QRs).

- When you receive a new lead from us, you can evaluate the lead before committing to it.
- We let you know what lead information is available (email, phone, etc.) and if other dealers already responded, you know what they are offering. Nobody let you do that.
- And there is no obligation to accept any leads. You can decline any lead you don't want to deal with.

By providing full information and complete transparency our system always allows you to make intelligent decisions.

# **Working with Active Leads (Active QRs).**

- Once you are committed to the lead (QR) you receive access to all available lead information (email, phone, etc.).
- You provide quotes while always being informed what other dealers have to offer.
- You communicate with the lead in your own private chat room to get more details, receive the feedback, etc.
- Your negotiation is stored in one place and presented to you in a convenient way, and since it's an Internet based service, you can get back to it at anytime from anywhere.

Once again, by providing full information and complete transparency our system allows you to make intelligent decisions, to make better offers and to close more deals.

**Take a look at some screen  
shots to get a better idea how  
CARACOOM works...**

When potential buyer files QR, the new lead/QR is added to your NEW Quote Requests list and you receive email notification.
